AKSHAY CHAUDHARY

MERN Stack Developer | akshay.dev307@email.com | https://github.com/AkshayBuilds | +91 93168 47190

Passionate MERN Stack Developer with hands-on experience building full-stack web applications using MongoDB, Express.js, React.js, and Node.js. Experienced in REST API development, JWT-based authentication, and scalable backend architecture following MVC principles. Strong understanding of state management, responsive UI design, and performance optimization. Familiar with Git-based workflows and Agile development practices, focused on writing clean, maintainable, and production-ready code.

Work Experience

Pyonix Technology – Ahmedabad 2 January 2026 – 22 February 2026

React.js Developer Intern

- Developed responsive user interfaces using React.js and modern JavaScript (ES6+).
- Built reusable components to improve application scalability and maintainability.
- Integrated REST APIs with frontend using Axios / Fetch.
- Optimized performance by reducing unnecessary re-renders.
- Collaborated with backend team to ensure smooth API integration.
- Used Git & GitHub for version control and team collaboration.

Education

Swarnim Startup & Innovation University – Gandhinagar 2023 - 2026

Bachelor of Computer Applications

Skill & Achievements

- **Frontend** : React.js, Redux / Context API, HTML5, CSS3, Tailwind CSS / Bootstrap, JavaScript (ES6+)
- **Backend** : Node.js, Express.js, REST API Development, JWT Authentication, Middleware
- **Database** : MongoDB, Mongoose
- **Tools** : Git & GitHub, Docker, Postman, VS Code
- **Soft Skills** : Problem Solving, Team Collaboration, Time Management, Communication Skills

Projects

- **AuthFlow – Full Stack Authentication System**

  Tech Stack: MongoDB, express.js, React.js, node.js
  - Built a full-stack authentication system with secure JWT-based Login and Registration.
  - Implemented Forgot Password and Email Verification with OTP validation.
  - Structured backend using MVC architecture (Models, Controllers, Routes, Middleware).
  - Secured user data with password hashing and MongoDB integration.
  - Managed global state using React Context API with efficient API handling.
  - Designed a responsive, clean UI with proper component-based structure.
- **FoodReel – MERN Food Reels Platform**

  Tech Stack: MongoDB, Express.js, React.js, Node.js
  - Developed a full-stack MERN application featuring role-based authentication for Users and Food Partners (Register/Login/Logout).
  - Designed backend architecture following MVC pattern with structured Models, Controllers, Routes, and Middleware.
  - Implemented interactive food reels viewing system with like and save functionality using MongoDB.
  - Designed responsive frontend and implemented secure JWT-based authentication & protected routes.
